

Lab 4
164 web programming
2020/4/

task:

create a sinatra web application that has the following function

if you visit the page, you will see welcome and login link

click login link, you will see login form

login, if user id password not correct, you will see login form
with a sentence "userid/password not correct" under it.

if login ok, you will see:

"hello someone, welcome back, you have visited here x times"

with "logout" link under it

if you time any route in address bar, if you never logout, you will
also see

"hello someone, welcome back, you have visited here x times"

if you logout, you will see login form with "logged out" on top of it.
